

Pensionomics 2014:

Measuring the Economic Impact of DB Pension Expenditures

Key Findings

Benefits paid by state and local pension plans support a significant amount of economic activity in the state of Idaho.

Pension benefits received by retirees are spent in the local community. This spending ripples through the economy, as one person's spending becomes another person's income, creating a multiplier effect.

In 2012, expenditures stemming from state and local pensions supported...

- 10,139 jobs that paid \$382.7 million in wages and salaries
- \$1.4 billion in total economic output
- \$192.3 million in federal, state, and local tax revenues

... in the state of Idaho.

Each dollar paid out in pension benefits supported \$1.76 in total economic activity in Idaho.

Each dollar "invested" by Idaho taxpayers in these plans supported \$5.66 in total economic activity in the state.

Overview

Expenditures made by retirees of state and local government provide a steady economic contribution to Idaho communities and the state economy. In 2012, 40,871 residents of Idaho received a total of \$747.6 million in pension benefits from state and local pension plans.

The average pension benefit received was \$1,524 per month or \$18,292 per year. These modest benefits provide retired teachers, public safety personnel, and others who served the public during their working careers income to meet basic needs in retirement.

Between 1993 and 2012, 31.08% of Idaho's pension fund receipts came from employer contributions, 17.27% from employee contributions, and 51.65% from investment earnings. Earnings on investments and employee contributions—not taxpayer contributions—have historically made up the bulk of pension fund receipts.

Impact on Jobs and Incomes

Retiree expenditures stemming from state and local pension plan benefits supported 10,139 jobs in the state. The total income to state residents supported by pension expenditures was \$382.7 million.

To put these employment impacts in perspective, in 2012 Idaho's unemployment rate was 7.3%. The fact that DB pension expenditures supported 10,139 jobs is significant, as it represents 1.3 percentage points in Idaho's labor force.

Economic Impact

State and local pension funds in Idaho and other states paid a total of \$747.6 million in benefits to Idaho residents in 2012. Retirees' expenditures from these benefits supported a total of \$1.4 billion in total economic output in the state, and \$682.2 million in value added in the state.

\$609.3 million in direct economic impacts were supported by retirees' initial expenditures. An additional \$465.2 million in indirect impact resulted when these businesses purchased additional goods and services. \$276.8 million in induced impacts occurred when workers employed by businesses as a result of the direct and indirect impacts made expenditures.

————— Total Economic Impact **\$1.4 billion** —————

**DIRECT
IMPACT**
\$609.3 million

**INDIRECT
IMPACT**
\$465.2 million

**INDUCED
IMPACT**
\$276.8 million

Economic Multipliers

Taxpayer Contribution Factor*

\$1.00

contributed by taxpayers to Idaho pensions over 30 years

\$5.66

total output

Each \$1 in taxpayer contributions to Idaho's state and local pension plans supported \$5.66 in total output in the state. This reflects the fact that taxpayer contributions are a minor source of financing for retirement benefits—investment earnings and employee contributions finance the lion's share.

Pension Benefit Multiplier

\$1.00

pension benefits paid to retirees in Idaho

\$1.76

total output

Each \$1 in state and local pension benefits paid to Idaho residents ultimately supported \$1.76 in total output in the state. This "multiplier" incorporates the direct, indirect, and induced impacts of retiree spending, as it ripples through the state economy.

*Caution should be used in interpreting these numbers. See the Technical Appendix of the full *Pensionomics* report for details.

Impact on Tax Revenues

State and local pension payments made to Idaho residents supported a total of \$192.3 million in revenue to federal, state, and local governments. Taxes paid by retirees and beneficiaries directly out of pension payments totaled \$60.2 million. Taxes attributable to direct, indirect and induced impacts accounted for \$132.1 million in tax revenue.

Federal Tax	\$81.0 million
State/Local Tax	\$111.2 million
Total	\$192.3 million

Economic Impacts by Industry Sector

The economic impact of state and local pension benefits was broadly felt across various industry sectors in Idaho. The ten industry sectors with the largest employment impacts are presented in the table below.

Industry	Employment Impact (# Jobs)	Labor Income Impact	Value Added Impact	Output Impact
Food Services and Drinking Places	814	\$15,021,525	\$21,688,265	\$41,952,847
Real Estate Establishments	639	\$5,495,221	\$50,609,455	\$68,463,695
Physicians, Dentists, and other Health Practitioners	461	\$30,588,119	\$31,231,905	\$49,989,272
Private Hospitals	377	\$26,180,400	\$29,731,318	\$51,635,103
Wholesale Trade Businesses	300	\$18,730,668	\$32,355,761	\$53,944,875
Nursing and Residential Care Facilities	295	\$9,007,089	\$10,528,753	\$15,947,196
Private Household Operations	240	\$1,042,811	\$1,042,811	\$1,042,811
Retail Stores - Food and Beverage	240	\$6,309,725	\$8,332,125	\$12,301,684
Retail Stores - General Merchandise	224	\$6,522,555	\$10,474,199	\$13,017,452
Securities, Commodity Contracts, and Investments	175	\$5,819,175	\$3,358,806	\$22,517,931

Industry totals include the first round of impacts from pension payments to state residents, and do not account for recaptured "leakage" to or from other states.
